

UNITED STATES DISTRICT COURT
NORTHERN DISTRICT OF CALIFORNIA

CASE NO. CR-14-00175-TEH

THE UNITED STATES v. PACIFIC GAS AND ELECTRIC COMPANY

REVISED EXHIBIT LIST – APRIL 25, 2016

() GOVERNMENT

(X) DEFENDANT

Consistent with the defendant's right to an effective defense, PG&E may offer additional exhibits, depending upon the government's presentation of its case. Additionally, PG&E removed exhibits from its list that were also on the government's list to avoid duplication. If a second trial phase on the government's Alternative Fines Act allegations becomes necessary, PG&E may add exhibits in response to the government's presentation.

PG&E's trial preparation, including its analysis of potential exhibits, has been impacted by the government's late discovery productions. Since January 11, 2016, when the parties filed their motions *in limine*, the government has produced about 600,000 pages of evidence. Much of this discovery is documents from the Pipeline and Hazardous Materials Safety Administration ("PHMSA") and the National Transportation Safety Board ("NTSB") that the government was required to produce seven or more months earlier. *See* Dkt. 452 at 2. That massive amount of discovery includes over 229,000 pages produced since the first pretrial conference on March 22, 2016, and about 121,000 pages of discovery produced just two weeks ago on April 11. *See* Dkt. 485. PG&E is still reviewing and analyzing these materials, as described in the document review status reports PG&E files every two days. *See, e.g., id.* PG&E may offer additional documents due to the government's late productions.
